

## FAMILY CHILD CARE PROVIDERS

# BUSINESS & FINANCIAL

## Coaching

Family child care providers who are ready to take positive steps toward building a stronger business can benefit from business and financial coaching. This opportunity to work one-on-one with a Business Development Specialist is available at no cost to graduates of the Business & Financial Fundamentals training series or the Business Leadership Cohort. Coaching starts with each child care entrepreneur taking a closer look at their business and then moves toward helping to identify their business and financial goals. Throughout the coaching experience, First Children's Finance Business Development Specialists share tools and practices to help providers reach those goals.

### Coaching Towards Success

Past participants have focused on topics such as budgeting, policies, time-space calculations for taxes, cost per child to help determine tuition, and retirement planning.

### The Best Part: It's **FREE!**

The first step toward receiving coaching is to complete the Business & Financial Fundamentals training series or the Business Leadership Cohort.
